If you look for them you will probably find some of the isomers of dioxin. I'll forward to our chemists. Steve, Dave and Raj any input?

Subject: F.J. Doyle Salvage Site

Greg:

Can you get this to the right person if not you?

We are going to be demolishing a building at a former PCB dismantling facility. They did do cutting and grinding on the transformers. It is a metal building with wood structures.

We are going to do the following: Asbestos Inspection – Required for Reno/Demo
We are planning on doing PCB wipe samples to include analysis for Aroclor 1268 (Galbestos?)
We are going to sample for lead paint

Question: Is there a need to include Dioxins/Furans for the wipe samples?

Thanks
